- Categorization and arrangements management system depending on the type of garment.

## SOLUTIONS

Within **H. Optimal** solutions is the optimization and personalized management policy system of bonuses and/or commissions for vendors towards sales incentives..

Allows the study of results to evaluate the effectiveness of the adopted commission strategy, helping the taking of decisions ...

- Parameterization of commissions by season and seller.
- Parameterization of bonuses by type of store.
- Flexibility in defining the time intervals of application.

Completing H. Optimal is another solution related to the verification and information settings system, which facilitates the exploitation of corners and department stores. Essential for the effective operation of replenishments and Stock control.

Allows the integration of the corner sales information with the commissions and bonuses Heimdal system.

Checks the information provided between department stores and the modified information by Heimdal systems.
